Health Nugget

He who cures a disease may be the skillfullest, but he that prevents it is the safest physician. - Thomas Fuller

Whole food, plant-based (WFPB) diet— Just how healthy is the WFPB diet? Let's pretend that all its effects could be achieved through a drug. Imagine a big pharmaceutical company holding a press conference to unveil a new pill called Eunutria. They unveil a list of scientifically proven effects of Eunutria that includes the following:

- Prevents 95 percent of all cancers, including those "caused" by environmental toxins.
- Prevents nearly all heart attacks and strokes
- Prevents and reverses Type 2 diabetes so quickly and profoundly that, after three days on this drug, it's dangerous for users to continue to use insulin.

What about side effects, you ask? Of course there are side effects. They include:

- Gets you to your ideal weight in a healthy and sustainable fashion
- Eliminates most migraines, acne, colds and flu, chronic pain, and intestinal distress
- Improves energy
- Cures erectile dysfunction (that makes the pill a blockbuster success all by itself!).

How healthy is the WFPB diet? It's hard to imagine anything healthier— or anything more effective at addressing our biggest health issues. Not only is WFPB the healthiest way of eating that has ever been studied, but it's far more effective in promoting health and preventing disease than prescription drugs, surgery, vitamin and herbal supplementation, and genetic manipulation.

If the WFPB diet were a pill, its inventor would be the wealthiest person on earth. Since it isn't a pill, no market forces conspire to advocate for it. No mass media campaign promotes it. No insurance coverage pays for it. Since it isn't a pill, and nobody has figured out how to get hugely wealthy by showing people how to eat it, the truth has been buried by half-truths, unverified claims, and downright lies. The concerted effort of many powerful interests to ignore, discredit, and hide the truth has worked so far.
