Where Have You Been?

For we are God's handiwork, created in Christ Jesus to do good works, which God prepared in advance for us to do.
Ephesians 2:10 (NIV)

Missionary Egerton Ryerson Young served the Salteaux tribe in Canada in the 1700s. The chief of the tribe thanked Young for bringing the good news of Christ to them, noting that he was hearing it for the first time in his old age. Since he knew that God was Young's heavenly Father, the chief asked, "Does that mean He is my Father too?" When the missionary answered, "Yes," the crowd that had gathered around burst into cheers.

The chief was not finished, however, "Well," said the chief, "I do not want to be rude, but it does seem to me. . . That it took a long time for you to . . . Tell it to your brother in the woods." It was a remark that Young never forgot.

Many times I've been frustrated by the zigs and zags of my life, thinking of the people I could reach *if only*. Then God reminds me to look around right where I am, and I discover many who have never heard of Jesus. In that moment, I'm reminded that I have a story to tell wherever I go, "for the same Lord over all is rich to all who call upon Him. For 'whoever calls on the name of the Lord shall be saved'" (Rom. 10:12-13).

Remember, we don't have just any story to tell — it's the best story that has ever been told. Randy Kilgore, *Our Daily Bread*

The Mamoras are celebrating the birth of their granddaughter, Penelope Ruth Thompson, born on May 20, at 8:14am. Weighing in at 7lbs 3oz, and 19-1/2 inches. Mommy, Gita, and daddy, Jonathan are doing well too.

A big Thank you! To Greg Fox and A.D. Hall for the very professional exit signs now in every room!!

Health Nugget

Your Remarkable Immune System

A review of more than 206 epidemiological studies shows that the consumption of raw green vegetables has the most consistent and powerful association with reduction of cancer of all types, including stomach, pancreas, colon, and breast. How many green vegetables do *you* eat a day?

Exposure to the virus and its multiplication within our body is at the core of viral infections. However, though it is not generally recognized, the virus adapts itself to the host (our body) and becomes dangerous and multiplies *as a result of the host's disease-promoting environment*, created by nutritional inadequacy. In most cases, a virus, when exposed to a healthy, well-nourished body, would remain harmless.

This means that poor nutrition not only makes us more susceptible to viruses but significantly impacts the length and severity of an illness.
