Health Nugget

15 Health Tips for the New Year

Tip # 2

Don't forget strength training, involving both the upper and lower body. Too many people neglect resistance exercise, particularly women for whom it's crucial for preventing muscle and bone loss with age. Lift weights for at least 20 minutes, two- to three-times per week.

Tip # 3

Don't pop too many vitamins. Enthusiasm for vitamin pills is high, but evidence for their benefits is low. Try to get vitamins from foods and consider a multivitamin for insurance. Any woman thinking about getting pregnant should make sure to take a folic acid supplement. Women should get at least 1,000 mgs of calcium per day (1,200 mgs/day if you're past menopause) from food and/or supplements. Everyone should also get 800 international units of Vitamin D per day -- more than the federal "Recommended Daily Allowance."

-Dr. JoAnn Manson, chief of the division of preventive medicine at Brigham and Women's Hospital and professor of Medicine at Harvard Medical School
